(Without Abstract)

Welcome to the seventh issue of the FBIM Transactions, an international peer-refereed academic journal, official journal of the non-profit organization MESTE, and the Faculty of Business and Industrial Management of the "Union – Nikola Tesla" University in Belgrade, and the SZ & Associates - Toronto. This issue is published online and in print.

The FBIM Transactions journal is registered in DOI system by CrossRef with **DOI 10.12709/issn.2334-704X**. All articles published in this issue, as well as in the previous issues of the FBIM Transactions, have their own DOIs. The FBIM Transactions journal is registered in **doiSerbia** of the **National Library of Serbia**, **COBOB.SR**, **Matica Srpska Library**, **COBISS.SR**, and **EleCas** base of **KoBSON**. We keep the practice that articles, that have undergone peer review, and will be published in the next issues, we make available to readers in the form of preview - early reading. The focal point of the journal remained at international level, with the view on matters from a global perspective. However, due to their importance, in this issue have been published some papers relating to some specific local events.

In this issue fifteen of submitted papers were published, of which nine were classified in the group of scientific papers (two original scientific papers and seven review papers), four in the group of professional papers, and two belong to a group of position paper and case study. Most of the articles is multidisciplinary. However, one paper could be classified to the area of finance, three to the field of doing business in its narrow sense, five to the field of information technology, and four to the field of management. In this issue, seven articles, from different aspects, discuss the problems of fraud and corruption, and their impact on the society.

We follow the mission and vision of the journal, and we help authors to publish their works and present their achievements in the most convenient way. However, it should be borne in mind that the editors do not censor the works that we publish, as well as the published works can contain and/or proclaim views that could differ from the views of the editorial board. We check articles on plagiarism, but we are not able to guarantee the accuracy of the data published in scientific and professional works of our authors. We believe that our authors are honorable and publish only their original works with really achieved results. For the quality of papers we publish we thank the authors and reviewers who did their job well and conscientiously.

You can follow us on the Facebook:

<https://www.facebook.com/www.meste.org?ref=profile>,

as well as on the Twitter:

<https://twitter.com/MesteZc>.

We invite you to publish your works with our motto:

"If you wish to be quoted, people first have to hear about you".

We will help you!
