October 15th, 2018
(Without Abstract)

Welcome to the October 2018 issue of the FBIM Transactions, an international peer-reviewed academic journal, the official journal of the non-profit organization MESTE, and the Faculty of Business and Law of the "Union – Nikola Tesla" University in Belgrade, and the SZ & Associates - Toronto. This issue is published online and in print.

The focal point of the journal remained at international level, with the view on matters from a global perspective. However, due to their importance, in this issue have been published some papers relating to some specific local events. Twenty papers have been published in this issue, five of which have been classified as original scientific papers, and fifteen as review articles. Most of the works are multidisciplinary. However, two papers could be classified in the field of finance, four in the field of economics, four in the field of information and industrial technologies, six in the field of management, and four papers discuss the problems of a society.

All articles published in this issue, as well as in the previous issues of the FBIM Transactions journal have their own DOIs.

We keep the practice that articles, that have undergone peer review, and will be published in the next issues, we make available to readers in the form of preview - early reading.

We follow the mission and vision of the journal, and we help authors to publish their works and present their achievements in the most convenient way. It should be borne in mind that the editors do not censor the works that we publish. The published works can contain and/or proclaim views that could differ from the views of the editorial board. We check articles on plagiarism, but we are not able to guarantee the accuracy of the data published in scientific and professional works of our authors. We believe that our authors are honorable and publish only their original works with really achieved results. For the quality of the papers we publish, we thank the authors and reviewers who did their job well and conscientiously.

You can follow us on the Facebook:

<https://www.facebook.com/www.meste.org?ref=profile>

as well as on the Twitter:

<https://twitter.com/MesteZc>

We invite you to publish your works with our motto:
"If you wish to be quoted, people first have to hear for you".
We will help you!

Prof. Dr. Zoran Čekerevac
Editor-in-Chief
