

Belgrade
January 15th, 2015

Welcome to the fifth issue of the MEST Journal, an international peer-refereed academic journal, official journal of the non-profit organization MESTE, and the Faculty of Business and Industrial Management of the "Union" University in Belgrade, and the SZ & Associates - Toronto. This issue is published online and in print

The MEST Journal is registered in DOI system by CrossRef with **DOI 10.12709/issn.2334-7058**. All articles published in this issue, as well as in the previous issues of the MEST Journal, have their own DOIs. The MEST Journal is registered in **doiSerbia** of the **National Library of Serbia, COBOB.SR, Matica Srpska Library, COBISS.SR**, and **EleCas** base of **KoBSON**.

We keep the practice that articles, that have undergone peer review, and will be published in the next issues, we make available to readers in the form of preview - early reading. The focal point of the journal remained at international level, with the view on matters from a global perspective. However, due to their importance, in this issue have been published some papers relating to some specific local events.

In this issue twenty-one of submitted papers were published, of which five were classified in the group of research scientific papers, six in the group of scientific review papers, and five in the group "Case study". Here are also published one professional paper and one position paper. Most of the articles is multidisciplinary. However, ten papers could be classified to the area of economics. Other articles belong to groups of finance, management, technology or environmental sciences.

We follow the mission and vision of the journal, and we help authors to publish their works and present their achievements in the most convenient way. However, it should be borne in mind that the editors do not censor the works that we publish, as well as the published works can contain and/or proclaim views that could differ from the views of the editorial board. We check articles on plagiarism, but we are not able to guarantee the accuracy of the data published in scientific and professional works of our authors. We believe that our authors are honorable and publish only their original works with really achieved results. For the quality of papers we publish we thank the authors and reviewers who did their job well and conscientiously.
