Belgrade, January 15th, 2020

Welcome to the newest issue of the MEST Journal!

Four years ago, we have started to use a new platform for publishing our journal, Open Journal System (OJS). All the previous issues we republished on it. At the request of readers and authors, we are prolonging the publication of both versions of the journal.

Between the two issues of the MEST Journal, we have included in the Scientific Board of the MEST Journal as permanent members two renowned scientists, prof. dr. Sergey Kirsanov and prof. Dr. Evgeny Safonov. Also, we actively participated in the organization and realization of the International Scientific Conference "ZITEH 2019" which dealt with the topic "Modern Information Technology - Use, Misuse, and Protection". The conference was fruitful, and we plan to organize it this year again.

The MEST Journal is registered in the DOI system by CrossRef and all articles published in this issue, as well as in the previous issues of the MEST Journal, have their own DOIs. The MEST Journal is registered in doiSerbia of the National Library of Serbia, COBIB.SR, Matica Srpska Library, COBISS.SR, Google Scholar, CrossRef, OALIB, EleCas base of KoBSON, the Index Copernicus ICI Journals Master List (ICV 2018 = 100.00), Scilit, ROAD, ERIH PLUS, CiteFactor, and in the ResearchBib.

We keep the practice that articles, that have undergone peer review, and will be published in the next issues, we make available to readers in the form of preview - early reading.

This issue is published online and in print. In this issue, fifteen of the submitted papers were published, of which seven were classified in the group of the original research scientific papers, and eight in the group of the scientific review articles.

We follow the mission and vision of the journal, and we help authors to publish their works and present their achievements in the most convenient way. However, we point out that the editors do not censor the works that we publish, as well as the published works, can contain and/or proclaim views that could differ from the views of the editorial board. We check articles on plagiarism, but we are not able to guarantee the accuracy of the data published in the scientific and professional works of our authors. We believe that our authors are honorable and publish only their original works with really achieved results. For the quality of papers that we publish, we thank the authors and reviewers who did their job well and conscientiously.

We invite you to publish your works, and we will help you!

Zoran Čekerevac
